Informazioni tecniche

Caratteristiche generali

Magneti Marelli After Market Parts and Services ha realizzato una gamma completa ed in costante aggiornamento di candele di preriscaldamento composta da 139 codici che assicurano una copertura del 95% del parco circolante europeo.

La gamma comprende candele Auto-regolanti, a Riscaldamento Istantaneo ed equivalenti alla ceramica: tutte le più recenti tecnologie del settore, per soddisfare in maniera ottimale ogni requisito di applicazione.

Progettate e realizzate secondo gli standard qualitativi dei maggiori costruttori europei, le candele di preriscaldamento Magneti Marelli garantiscono:

- Partenze a freddo ultra rapide anche in presenza di rigide condizioni ambientali
- Riduzione dei consumi e delle emissioni inquinanti grazie al mantenimento di temperature elevate
- Rispetto delle certificazioni ISO 6550, ISO 7578, e della recente ISO17447-1 2015
- Affidabilità e lunga durata.

Realizzate con materiali attentamente selezionati per resistere alle più impegnative sollecitazioni di tipo meccanico, tecnico, chimico ed elettrico, le candele Magneti Marelli garantiscono performance elevate, lunga durata e consumi ridotti. L'alta qualità del prodotto è assicurata dalla specifica esperienza di Magneti Marelli che, grazie alla costante collaborazione con i maggiori costruttori automobilistici, è in grado di proporre prodotti perfettamente rispondenti alle esigenze di ogni motore.

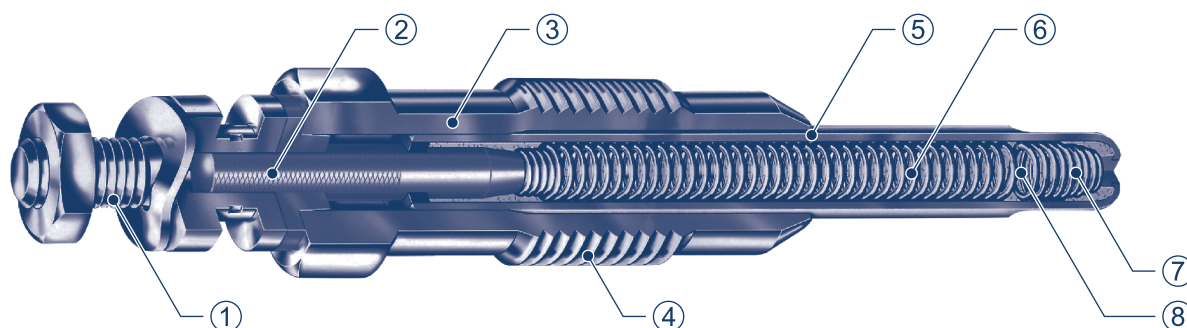

Gamma di candele Magneti Marelli

- Auto-regolanti: Candele in metallo con doppio filamento provviste della moderna tecnologia di pre e post riscaldamento. Sono predisposte per rimanere accese anche dopo l'avviamento del motore se la centralina lo richiede.
- A riscaldamento istantaneo: Candele in metallo dotate di tecnologia ISS – Instant Start System, con rendimento ottimizzato grazie alla centralina elettrica. Il tempo di riscaldamento è estremamente rapido, di circa 2 secondi. Questa tecnologia permette ai veicoli diesel un avviamento rapido come un motore a benzina.
- Ceramic equivalent ISS: Candele a riscaldamento istantaneo equivalenti alle candele in ceramica OE per funzione, dimensione e performance. Sono dotate di doppio filamento saldato con Inconel 601. Create per raggiungere sia tempi di riscaldamento estremamente brevi, fino a 950° C in meno di 2 secondi, sia temperature elevate, fino a un massimo di 1150° C.

Caratteristiche costruttive

Le candele di preriscaldamento sono composte principalmente da un corpo, un elemento riscaldante isolato e un terminale per la connessione elettrica. La seguente figura illustra le 9 caratteristiche principali delle candele standard in

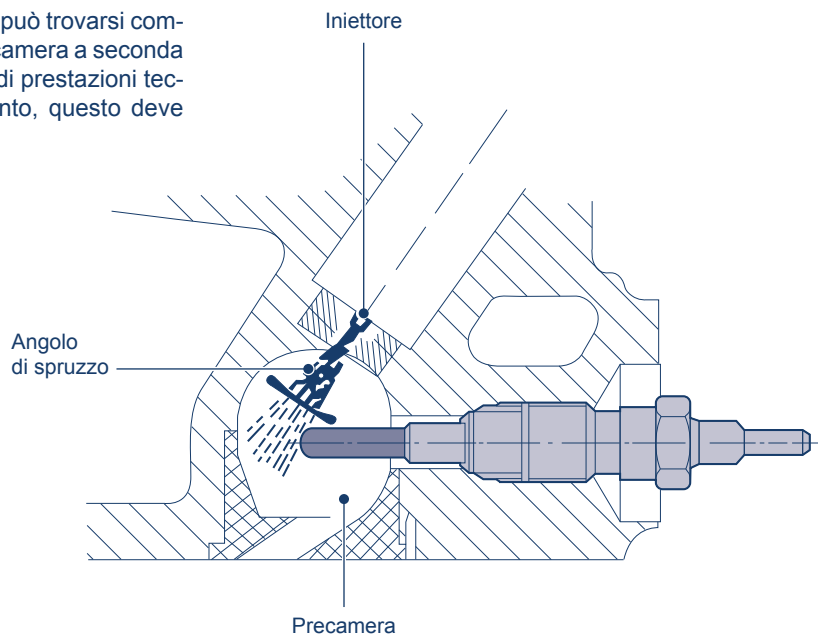

metallo. L'immagine è un campione che rappresenta le proprietà più significative, poiché esistono centinaia di varianti per aderire alle specifiche tecniche dei costruttori.

1. **Terminale.** Funge da connettore con la centralina elettrica. Si distinguono principalmente in due tipologie: terminale filettato o con connettore a pin.
2. **Elettrodo.** Grazie all'elettrodo in acciaio e rivestito in rame, la corrente è fornita al doppio filamento.
3. **Speciale guarnizione solante.** Assicura una perfetta tenuta e isolamento.
4. **Corpo candele.** Il corpo della candela è metallico, rivestito da Nickel.
5. **Guaina in superlega anticorrosione termica e chimica.** Realizzato con Inconel 601. Spessore variabile, specifico per ogni motore, in funzione delle temperature che si sviluppano all'interno delle precamere.
6. **Filamento regolante.** Grazie alle sue caratteristiche resistive controlla l'aumento della temperatura per riscaldare la miscela il più velocemente possibile e per permettere alla candela di restare calda senza subire danni. Realizzata con CoFe8.
7. **Filamento riscaldante.** Riscalda rapidamente la miscela per ottenere accensioni rapide anche in condizioni estreme e mantiene alta la temperatura del motore dopo l'avviamento per emissioni più pulite. Realizzata con Kanthal.
8. **Ossido di Magnesio.** Polvere isolante (Mg O) ad alta compressione. Elimina le intercapedini d'aria, evita di danneggiare il filamento resistivo isolandone le spire, conferendo alla candela un'alta qualità.

Sistemazione di una candeletta su motore

La posizione della punta incandescente può trovarsi compresa tra la periferia e il centro della precamera a seconda del tipo di motore e del tipo di richiesta di prestazioni tecniche. Nel caso di candele a filamento, questo deve sfiorare il cono di spruzzo.

Consigli per la sostituzione

Nel collegamento delle candele, comunque realizzato mediante morsetti, piattine, cavi, ecc., il terminale non deve essere sollecitato con eccessive flessioni, causa di possibili deformazioni (Fig. 1) e guasti alla tenuta della guarnizione. In queste condizioni e a causa di alternanze termiche (riscaldamento all'avviamento e raffreddamento all'arresto del motore), potrebbero venire aspirati all'interno della resistenza corazzata vapori di nafta, umidità, olio, ecc., con pericolo di corto circuito o interruzione della resistenza. Nei collegamenti di candele con terminale filettato e morsetto godronato (Fig. 2), occorre eseguire il serraggio manualmente senza l'ausilio di pinze.

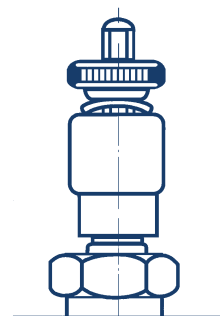

Fig. 2

Technical information

General specifications

Magneti Marelli After Market Parts and Services has developed a comprehensive and constantly updated range of pre-heating glow plugs of 139 part numbers, covering 95% of the European car park.

The offer includes Self Regulating, Instant Start System, and Ceramic equivalent glow plugs: all the latest technologies available on the market, to ensure the perfect fit on every application.

Magneti Marelli glow plugs are designed and produced in accordance with the quality standards of major European car manufacturers and guarantee:

- Ultra-rapid cold starting even under harsh weather conditions
- Reduced consumption and polluting emissions
- Compliance with ISO 6550, ISO 7578, and the latest ISO17447-1 2015 certifications.
- Total reliability and long life time

Manufactured using materials carefully selected to withstand even the most demanding mechanical, technical, chemical and electrical stress, Magneti Marelli glow plugs ensure high performance, long life time and reduced consumptions. The high quality of the product is guaranteed by Magneti Marelli's expertise which, thanks to constant collaborations with the major manufacturers, is able to offer products that perfectly meet every engine's requirements.

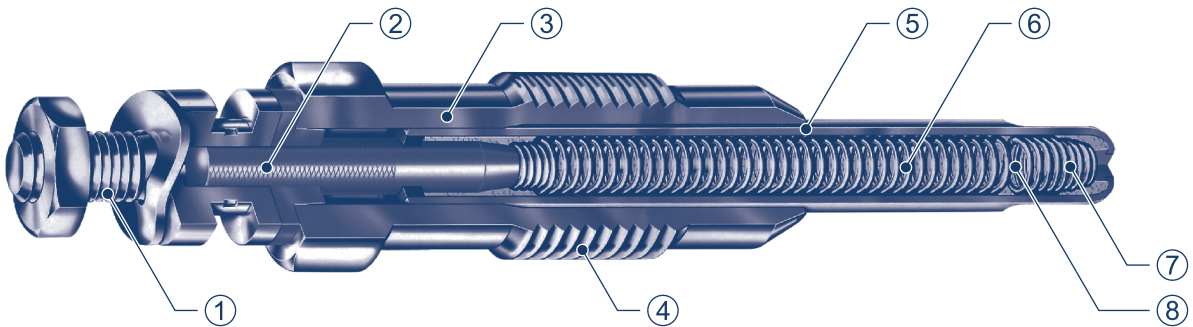

Magneti Marelli Glow plugs range

- Self-regulating: Metallic glow plugs, double coil regulated with pre and post heating capabilities. Designed to extend the glowing time after the engine's ignition if required by the control unit.
- Instant start system: Metallic glow plugs electronically controlled, based on ISS – Instant Start System technology. Extremely fast pre-heating within 2 seconds. Electronic regulation is more efficient and the cranking delay is as short as in petrol engines.
- Ceramic equivalent ISS: Instant start system glow plugs equivalent to OE ceramics in terms of dimensions, functions and performance. They are equipped with two heating coils encased in Inconel 601 metal sheath. Designed to reach very quick heating times, up to 950° C in less than 4 seconds, but also higher temperatures, up to 1150°C.

Features

Glow plugs are basically composed of a plug body, heating element, and terminal for electric connection. The following picture illustrates the 9 main parts of a standard metallic glow plug. The image is representative of the most relevant

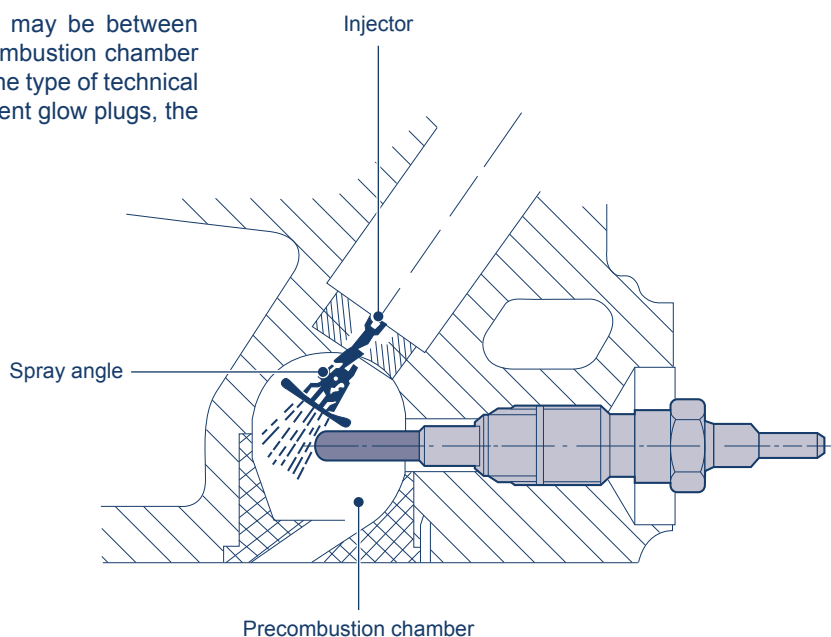

glow plugs features, but hundreds of variations are available on the market depending on each manufacturer's technical requirements.

1. **Terminal.** It is a connector with the electric supply. Terminals are predominantly nickel threaded or pin junction.
2. **Electrode.** Thanks to the copper plated steel electrode, the current is supplied to the coil or double coils.
3. **Body with twin seat and special insulating seal.** Ensures perfect sealing and insulation.
4. **Plug body.** The plug body is metallic, nickel-plated.
5. **Thermal and chemical corrosion-proof super-alloy sheath.** Manufactured with Inconel 601. Variable thickness, specific for every engine, depending on the temperatures developed in each engine pre-combustion chamber.
6. **Regulating coil.** The resistance features of this coil control the temperature increase, to heat-up the plug as fast as possible while allowing it to maintain the temperature up to three minutes without the risk of damage. Manufactured with Cofe8
7. **Heating coil.** Quickly heats up the fuel for fast starting even in harsh weather conditions and maintains a high temperature in the engine to reduce polluting emissions. Made of Kanthal.
8. **Magnesium oxide.** High compression insulating powder (Mg O). It eliminates the air gaps and prevents any damage to the resistive filament while insulating its coils, making the glow plug top quality.

Positioning of glow plug in engine

The position of the incandescent tip may be between the edge and the center of the pre-combustion chamber depending on the type of engine and the type of technical performance required. In case of filament glow plugs, the filament must skim the spray cone.

Fitting recommendations

When connecting glow plugs with clamps, straps, cables, etc., the terminal must not be bent too much, which can be the cause of possible deformations (Fig. 1) and issues with the sealing. In these conditions and because of heat, diesel vapors, moisture, oil, etc. could get sucked into the armored resistor with the risk of short-circuits or interruptions. When connecting glow plugs with a threaded terminal and knurled clamp (Fig. 2), it is necessary to tighten by hand without the aid of pliers.

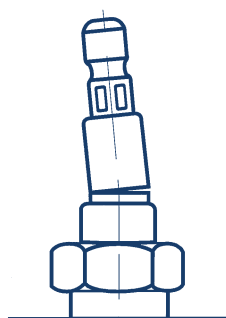

Fig. 1

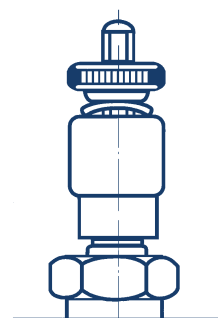

Fig. 2

Allgemeine Spezifikationen

Magneti Marelli After Market Parts und Services hat ein umfassendes und ständig aktualisiertes Sortiment an Vorglühkerzen mit 139 Artikelnummern entwickelt, das 95% des europäischen Parkraums abdeckt.

Das Angebot umfasst selbstregulierende, Schnellstartsysteme und gleichwertige Glühkerzen aus Keramik: Die neuesten auf dem Markt verfügbaren Technologien, um die perfekte Anpassung an jede Anwendung zu gewährleisten.

Magneti Marelli Glühkerzen werden in Übereinstimmung mit den Qualitätsstandards der wichtigsten europäischen Automobilhersteller entwickelt und garantieren:

- Extrem schnelles Kaltstartverhalten auch bei rauen Witterungsbedingungen
- Reduzierte Verbräuche und Schadstoffemissionen
- Einhaltung der ISO 6550, ISO 7578 und der neuesten ISO17447-1 2015 Zertifizierungen.
- Absolute Zuverlässigkeit und lange Lebensdauer

Hergestellt aus Materialien, die sorgfältig ausgewählt wurden, um selbst den anspruchsvollsten mechanischen, technischen, chemischen und elektrischen Belastungen standzuhalten, gewährleisten die Glühkerzen von Magneti Marelli hohe Leistung, lange Lebensdauer und reduzierten Verbrauch. Die hohe Qualität des Produkts wird durch das Fachwissen von Magneti Marelli garantiert, das dank der ständigen Zusammenarbeit mit den wichtigsten Herstellern in der Lage ist, Produkte anzubieten, die den Anforderungen jedes Motors perfekt entsprechen.

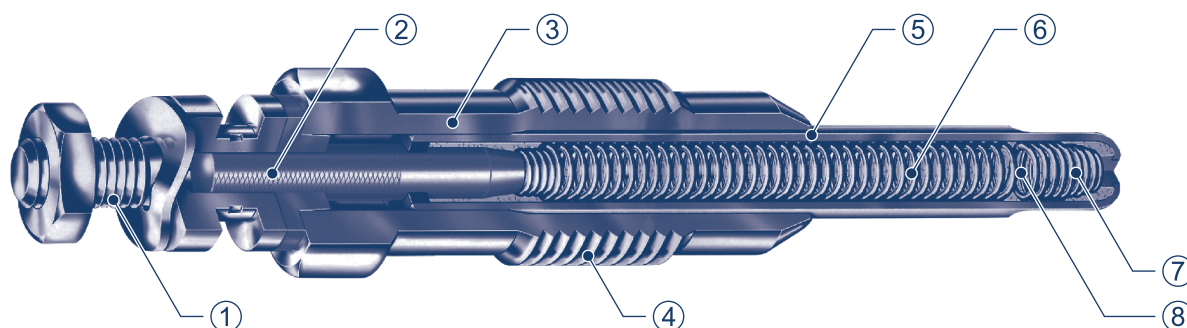

Magneti Marelli Glühkerzen Sortiment

- Selbstregulierend: Metallische Glühkerzen, Doppelspulenregelung mit Vor- und Nachheizmöglichkeit. Entwickelt, um die Glühzeit nach der Zündung des Motors zu verlängern, wenn es das Steuergerät erfordert.
- Sofortstartsystem: Metallische Glühkerzen elektronisch gesteuert, basierend auf der ISS - Instant Start System Technologie. Extrem schnelles Vorheizen innerhalb von 2 Sekunden. Die elektronische Regelung ist effizienter und die Anlassverzögerung ist so kurz wie bei Benzinmotoren.
- Keramisches Äquivalent ISS: Sofortstartsystem-Glühkerzen, die in Bezug auf Abmessungen, Funktionen und Leistung der OE-Keramik entsprechen. Sie sind mit zwei Heizspiralen ausgestattet, die mit einem Metallgehäuse aus Inconel 601 ummantelt sind. Entwickelt für sehr schnelle Aufheizzeiten, bis zu 950°C in weniger als 4 Sekunden, aber auch für höhere Temperaturen, bis zu 1150°C.

Merkmale

Glühkerzen bestehen im Wesentlichen aus einem Kerzenkörper, einem Heizelement und einer Klemme für den elektrischen Anschluss. Das folgende Bild veranschaulicht die 9 Hauptteile einer metallischen Standard-Glühkerze.

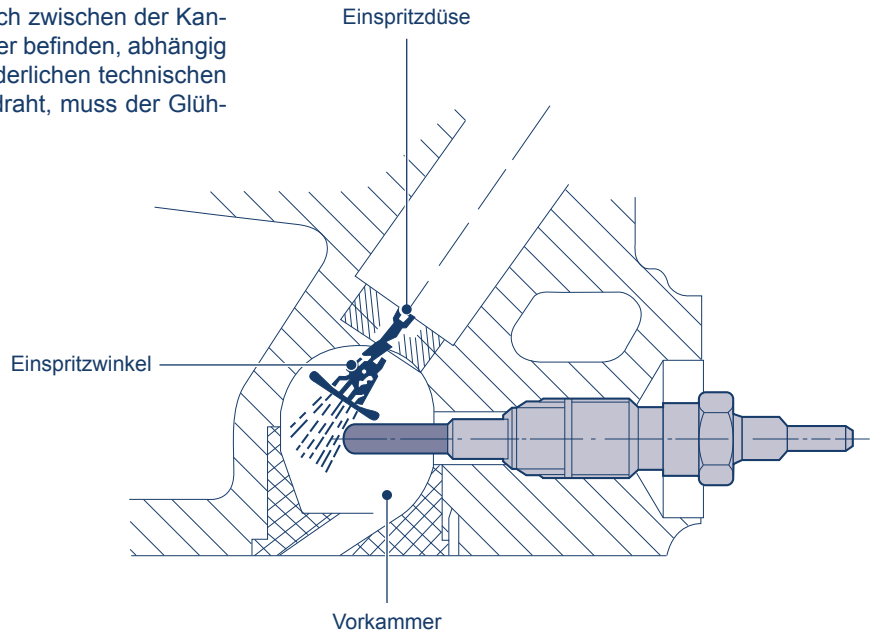

Das Bild ist repräsentativ für die wichtigsten Merkmale von Glühkerzen, aber je nach den technischen Anforderungen des jeweiligen Herstellers sind Hunderte von Varianten auf dem Markt erhältlich.

1. **Terminal.** Es handelt sich um einen Stecker mit der elektrischen Versorgung. Die Anschlüsse sind überwiegend mit Nickelgewinde oder Stiftverbindung ausgeführt.
2. **Elektrode.** Dank der verkupferten Stahlelektrode wird der Strom an die Spule oder Doppelspulen geleitet.
3. **Gehäuse mit Doppelsitz und spezieller Isolierdichtung.** Sorgt für perfekte Abdichtung und Isolierung.
4. **Steckergehäuse.** Der Steckerkörper ist aus Metall, vernickelt.
5. **Thermisch und chemisch korrosionsbeständiger Mantel aus Supermetalllegierung.** Hergestellt mit Inconel 601. Variable Dicke, spezifisch für jeden Motor, abhängig von den Temperaturen, die in jeder Motorvorverbrennungskammer entwickelt werden.
6. **Regelspирale.** Die Widerstandsmerkmale dieser Spule steuern den Temperaturanstieg, um den Stecker so schnell wie möglich zu erwärmen und gleichzeitig die Temperatur bis zu drei Minuten ohne Beschädigungsrisiko zu halten. Hergestellt mit Cofe8.
7. **Heizspiralе.** Erwärmt den Kraftstoff schnell für einen schnellen Start auch bei rauen Wetterbedingungen und hält eine hohe Temperatur im Motor aufrecht, um die Schadstoffemissionen zu reduzieren. Hergestellt aus Kanthal.
8. **Magnesiumoxid.** Hochkomprimierendes Isolierpulver (Mg O). Es eliminiert den Luftzwischenraum und verhindert jegliche Beschädigung der Widerstandsspule, während es seine Spulen isoliert. Dies garantiert eine Spitzenqualität der Glühkerze.

Positionierung der Glühkerze im Motor

Die Position der Glühspitze kann sich zwischen der Kante und der Mitte der Vorbrennkammer befinden, abhängig vom Motortyp und der Art der erforderlichen technischen Leistung. Bei Glühkerzen mit Glühdraht, muss der Glühdraht den Sprühkegel abschöpfen.

Montageempfehlungen

Beim Anschluss von Glühkerzen mit Klemmen, Bändern, Kabeln usw. darf die Klemme nicht zu stark gebogen werden. Dies kann die Ursache für mögliche Verformungen sein (Abb. 1) und zu Problemen mit der Dichtung führen. Unter diesen Bedingungen und aufgrund von Hitze können Dieseldämpfe, Feuchtigkeit, Öl usw. in den geschützten Widerstand gesaugt werden, mit der Gefahr von Kurzschlüssen oder Unterbrechungen. Beim Anschluss von Glühkerzen mit Schraubklemme und Rändelschelle (Abb. 2) ist es notwendig, diese ohne Zange von Hand anzuziehen.

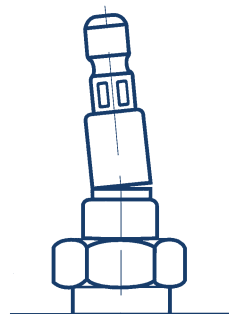

Abb. 1

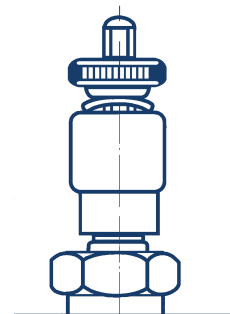

Abb. 2

Información técnica

Características generales

Magneti Marelli After Market Parts and Services ha realizado una gama completa y en constante actualización de bujías de precalentamiento compuesta de 139 códigos que aseguran una cobertura del 95% del parque circulante europeo.

La oferta incluye Bujías auto-reguladoras, de sistema de arranque instantáneo y equivalentes a las cerámicas: todas las últimas tecnologías disponibles en el mercado, para satisfacer de manera óptima cada requisito de cada aplicación.

Las bujías de precalentamiento Magneti Marelli están diseñadas y producidas según los estándares de calidad de la gran mayoría de constructores Europeos y garantizan:

- Arranque en frío ultra rápido, incluso en presencia de condiciones ambientales adversas.
- Reducción del consumo y de las emisiones.
- Cumplimiento con las certificaciones ISO 6550, ISO 7578, y la última ISO17447-1 2015.
- Fiabilidad total y larga vida útil.

Fabricadas con materiales cuidadosamente seleccionados para resistir al peor estrés mecánico, técnico, químico y eléctrico, las bujías de precalentamiento Magneti Marelli, aseguran su alto rendimiento, larga duración y consumos reducidos. La alta calidad del producto está asegurada por la experiencia de Magneti Marelli que, gracias a su constante colaboración con los mayores constructores automovilísticos, es capaz de ofrecer productos que responden perfectamente a los requerimientos de cada motor.

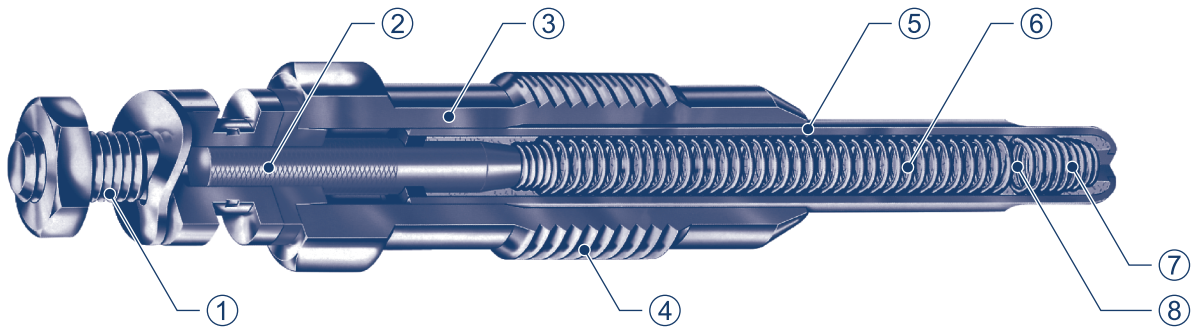

Gama de bujías de precalentamiento Magneti Marelli

- Auto-reguladoras: Bujías de precalentamiento metálicas, doble bobina regulada con capacidades de pre y post calentamiento. Están diseñadas para permanecer encendidas también después del encendido del motor si la centralita lo requiere.
- Sistema de Arranque Instantáneo: Bujías de precalentamiento metálicas controladas electrónicamente, basadas en la tecnología ISS (Instant Start System). Calentamiento extremadamente rápido en 2 segundos. La regulación electrónica es más eficiente y el retraso de arranque es tan corto como en los motores de gasolina.
- Equivalentes a las Cerámicas ISS: bujías de precalentamiento del sistema de arranque instantáneo equivalentes a las cerámicas OE en términos de dimensiones, funciones y rendimiento. Están equipadas con dos bobinas de calentamiento en funda de metal Inconel 601. Diseñadas para alcanzar tiempos de calentamiento muy rápidos, hasta 950°C en menos de 4 segundos, así como temperaturas de hasta 1150°C.

Características

Las bujías de precalentamiento están compuestas principalmente por un cuerpo, un elemento de calentamiento y un terminal la conexión eléctrica. La siguiente imagen ilustra las 9 principales piezas de una bujía de precalentamiento

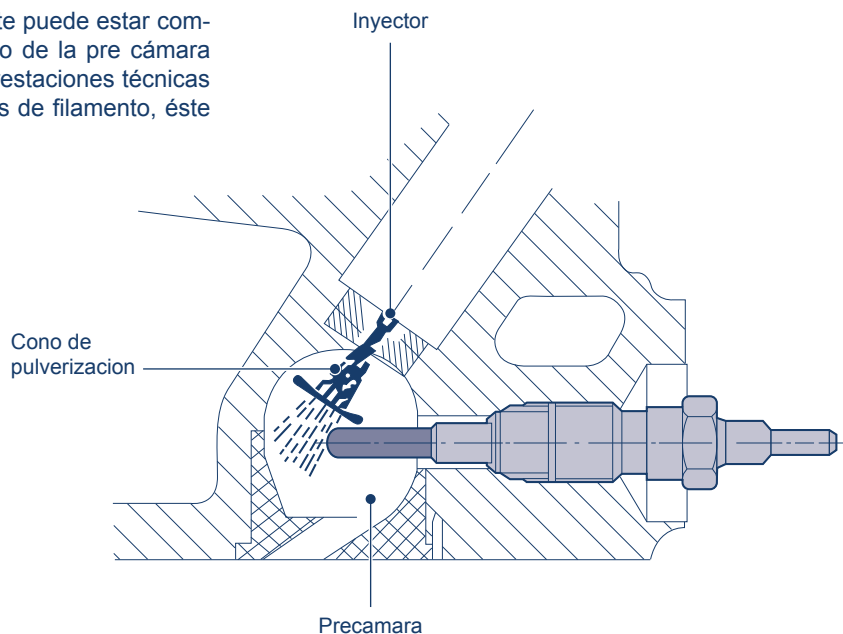

metálica estándar. La imagen muestra las características más representativas, aunque existen centenares de variaciones disponibles en el mercado en función de las especificaciones técnicas de los constructores.

- 1. Terminal.** Actúa como conector con la centralita eléctrica. Están principalmente divididos en dos tipos: con terminal roscado o con conector pin.
- 2. Electrodo.** Gracias al electrodo de acero chapado en cobre, la corriente se suministra a la bobina o a las bobinas dobles.
- 3. Cuerpo con doble base de apoyo y recubrimiento especial aislante.** Asegura unas perfectas características de estanqueidad y aislamiento.
- 4. Cuerpo Calentador.** El cuerpo de la bujía es metálica, revestida de Nickel.
- 5. Funda en superaleación anticorrosiva térmica y química.** Realizada con Inconel 601. Espesor variable en función de la temperatura específica para cada motor, que se desarrolla en el interior de la pre cámara.
- 6. Filamento regulador.** Gracias a sus características de resistencia controla el aumento de la temperatura para calentar la mezcla lo más rápido posible y así permitir que la bujía se mantenga caliente hasta 3 minutos sin riesgo de sufrir daños. Fabricado con CoFe8.
- 7. Filamento de calentamiento.** Calienta rápidamente la mezcla para obtener un encendido rápido incluso en condiciones extremas y mantiene alta la temperatura del motor una vez en marcha obteniendo unas emisiones más limpias. Hecho de Kanthal.
- 8. Óxido de magnesio.** Polvo aislante de alta compresión (Mg O). Elimina las brechas de aire y evita cualquier daño en el filamento resistivo mientras aísla sus bobinas, lo que hace que la bujía de precalentamiento sea de la mejor calidad.

Colocación de una bujía en el motor

La posición de la punta incandescente puede estar comprendida entre la periferia y el centro de la pre cámara según el tipo de motor y el tipo de prestaciones técnicas que se le pidan. En el caso de bujías de filamento, éste debe rozar el cono de pulverización.

Consejos para la sustitución

Para la conexión de las bujías, realizada mediante bornes, platillos, cables, etc., no hay que presionar el terminal con excesivas flexiones, ya que podría ser causa de posibles deformaciones (Fig. 1) y averías en el asiento de la guarnición. En estas condiciones y debido a alternancias térmicas (recalentamiento en el arranque y enfriamiento en la detención del motor), la resistencia acorazada podría absorber vapores de fuel, humedad, aceite, etc., con peligro de corto circuito o de interrupción de la resistencia. En las conexiones de bujías con terminal de rosca y abrazadera moleteada (Fig. 2), hay que realizar el ajuste manualmente sin la ayuda de herramientas.

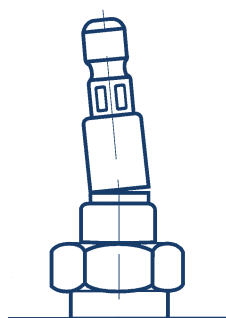

Fig. 1

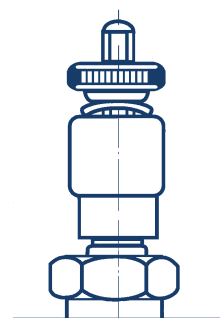

Fig. 2

Cechy ogólne

Spółka Magneti Marelli After Market Parts and Services opracowała obszerną i stale aktualizowaną gamę świec żarowych składającą się ze 139 kodów i zapewniającą pokrycie 95% zapotrzebowania europejskiego. Oferta świec żarowych składa się ze świec z regulacją temperatury (SRM – Self Regulating Metal), świec typu ISS (Instant Start System) i świec ceramicznych ISS: najnowsze technologie dostępne na rynku zastosowane w celu zapewnienia idealnego dopasowania do każdego pojazdu.

Świece żarowe Magneti Marelli, zaprojektowane i wykonane zgodnie ze standardami jakościowymi najważniejszych konstruktorów europejskich, gwarantują:

- Szybki rozruch w niskich temperaturach, również w razie surowych warunków środowiskowych;
- Ograniczenie zużycia i emisji substancji zanieczyszczających;
- Zgodność z wymaganiami ISO 6550, ISO 7578 i ISO17447-1 2015;
- Całkowita niezawodność i długa żywotność.

Produkcja odbywa się z użyciem starannie dobranych materiałów w celu zapewnienia odporności na działanie szkodliwych czynników mechanicznych, technicznych, chemicznych i elektrycznych. Świece żarowe Magneti Marelli zapewniają wysoką wydajność, długą żywotność i zmniejszają zużycie paliwa. Wysoka jakość produktu jest gwarantowana doświadczeniem Magneti Marelli, które dzięki ciągłej współpracy z najważniejszymi producentami pozwala oferować produkty w pełni spełniające wymagania każdego silnika.

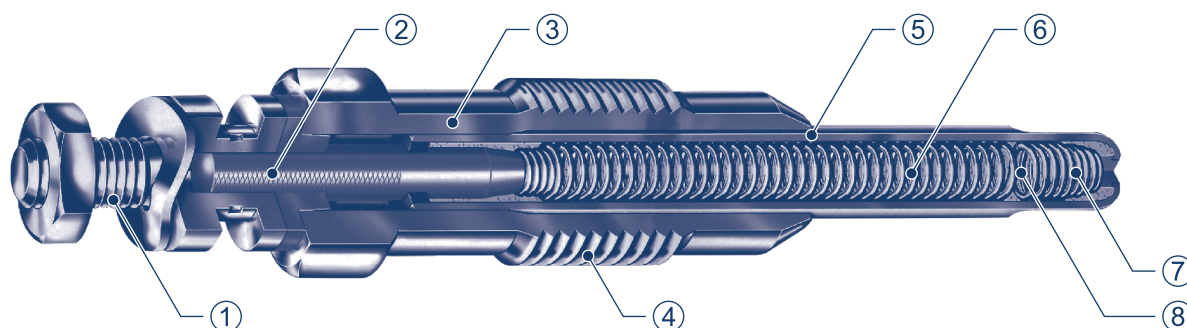

Gama świec żarowych Magneti Marelli

- Świece z regulacją temperatury (SRM – Self Regulating Metal): metalowe świece żarowe z podwójną spiralą mającą możliwość odpowiedniego nagrzania i utrzymania temperatury świecy. Zaprojektowane aby wydłużyć czas żarzenia po uruchomieniu silnika, jeżeli wymaga tego jednostka kontrolna.
- ISS (Instant Start System): metalowe świece żarowe kontrolowane elektronicznie, oparte na technologii ISS – Instant Start System. Błyskawiczne nagrzewanie w czasie do 2 sekund. Elektroniczna regulacja zwiększa wydajność i zmniejsza opóźnienie rozruchu do czasu porównywalnego z tym w silnikach benzynowych.
- Świece ceramiczne ISS: odpowiednik pierwszomontażowych świec żarowych pod względem wymiarów, funkcji i wydajności. Składają się z dwóch spiral odpowiedzialnych za nagrzewanie i utrzymanie temperatury świecy i ceramicznego elementu grzejnego w obudowie ze stopu niklowo-chromowo-żelazowego Inconel 601. Zaprojektowane tak, aby nagrzewać się w możliwie najkrótszym czasie i osiągać temperaturę 950° C w czasie poniżej 4 sekund i po dłuższym czasie być w stanie osiągnąć temperaturę do 1150° C.

Cechy konstrukcyjne

Świece żarowe zbudowane są z korpusu, elementu żarzącego i złącza. Ilustracja poniżej przedstawia 8 najważniejszych części z jakich składa się standardowa metalowa świeca żarowa. Ilustracja prezentuje najważniejsze

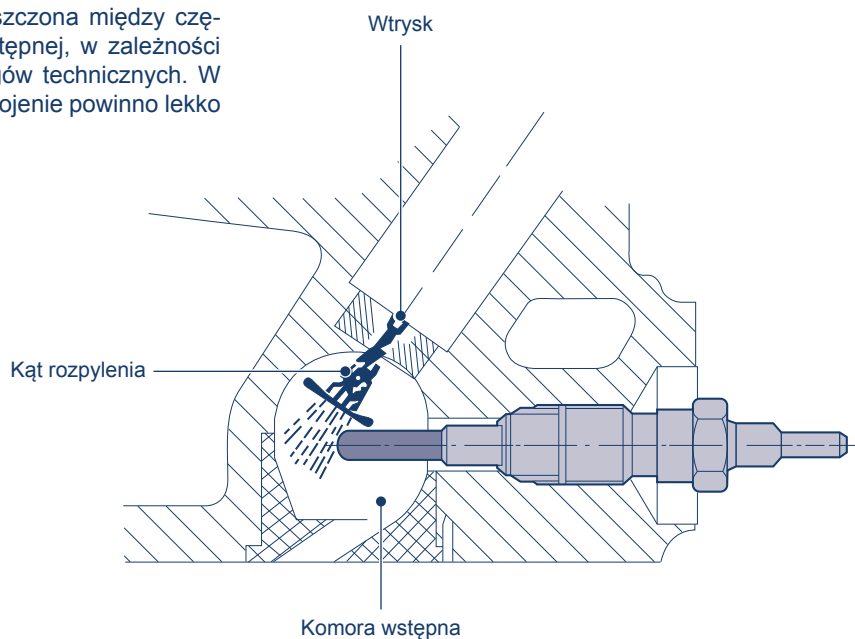

elementy konstrukcyjne świec żarowych, ale na rynku dostępne są setki różnych wersji świec żarowych, które różnią się od siebie w zależności od wymagań technicznych producenta.

- 1. Złącze.** Występuje w roli łącznika świecy ze źródłem zasilania elektrycznego. Przeważnie w świecach żarowych występują niklowane złącza gwintowane lub pinowe.
- 2. Elektroda.** Dzięki stalowej elektrodzie pokrytej miedzią, prąd jest transportowany do spiral.
- 3. Korpus z podwójnym gniazdem i specjalną uszczelką izolacyjną.** Zapewnia perfekcyjne przyleganie i izolację.
- 4. Obudowa.** W świecach żarowych standardowo obudowa wykonana jest z metalu z niklowym pokryciem.
- 5. Osłona ze stopu antykorozyjnego odporna na czynniki termiczne i chemiczne.** Wykonana ze stopu niklowo-chromowo-żelazowego Inconel 601. Zmienia grubość osłony, odpowiednia dla każdego silnika w zależności od temperatury osiąganey w komorze wstępnego spalania.
- 6. Spirala regulująca.** Właściwości opornościowe spirali pozwalają na kontrolę wzrostu temperatury, dzięki czemu świeca żarowa nagrzewa się w możliwie najkrótszym czasie, jednocześnie umożliwiając utrzymanie temperatury do trzech minut bez ryzyka uszkodzenia świecy. Wykonana z CoFe8.
- 7. Spirala grzejna.** Podgrzewa w szybki sposób mieszankę w celu natychmiastowego zapalenia również w ekstremalnych warunkach i utrzymuje wysoką temperaturę silnika po uruchomieniu, gwarantując czystszy emisję spalin. Wykonana z kantal.
- 8. Proszek izolacyjny (Mg O) o dużej kompresji.** Odpowiednia kompakcja eliminuje powstawanie przestrzeni powietrznych, zapobiega uszkodzeniu uzwojenia świecy, izolując jego zwoje i gwarantując wysoką jakość świecy.

Umieszczenie świecy w silniku

Żarowa końcówka może być umieszczona między częścią boczną i środkiem komory wstępnej, w zależności od rodzaju silnika i wymagań osiągnięć technicznych. W przypadku świec z uzwojeniem, uzwojenie powinno lekko dotykać kąta rozpylenia.

Zalecenia podczas wymiany

Podczas montażu świec, wykonywanego zawsze za pomocą zacisków, taśm, kabli, itp., końcówka nie powinna być narażona na nadmierne zagięcia, ponieważ może to spowodować deformacje (Fig. 1) i uszkodzenia szczelności uszczeltek. W takich warunkach i na skutek zmian termicznych (rozgrzanie podczas uruchamiania i ochłodzenie podczas zatrzymania silnika) mogłyby zostać zassane do wnętrza opary nafty, wilgoć, olej, itp., powodując niebezpieczeństwo powstania zwarcia lub odcięcia. Podczas łączenia świec z gwintowaną końcówką i zaciskiem radełkowanym (Fig. 2), należy dokręcić świecę manualnie, bez użycia szczypców.

Magneti Marelli After Market Parts and Services S.p.A. ha curato con particolare attenzione la stesura del presente catalogo; declina comunque ogni responsabilità per eventuali errori od omissioni relativi a schemi, disegni, immagini, corrispondenze con i codici O.E. ecc. e si riserva il diritto di apportare modifiche al contenuto senza l'obbligo di darne preventiva comunicazione. Sono particolarmente graditi, da parte degli utenti, commenti, segnalazioni di inesattezze e qualsiasi altro suggerimento atto a rendere più efficace la prossima edizione del catalogo.

Magneti Marelli After Market Parts and Services S.p.A. has devoted its best attention to the editing of this catalogue; it nevertheless declines any responsibility for possible mistakes or omissions regarding figures, drawings, pictures, correspondence with O.E. codes etc. and it reserves the right to modify the contents without prior notice. Users' comments, reports of inaccuracies or any other suggestions which may in any way improve the next edition of this catalogue are warmly welcomed.

Magneti Marelli After Market Parts and Services S.p.A. hat diesen Katalog sorgfältig verfasst. Die Firma enthebt sich jeglicher Verantwortung für eventuelle Fehler oder Auslassungen hinsichtlich Schemen, Darstellungen, Bilder, Zeichnungen, Übereinstimmungen, mit O.E. Codes usw. und behält sich das Recht vor, ohne Ankündigung, am Inhalt Veränderungen vorzunehmen. Anmerkungen, Fehlerhinweise und weitere Anregungen seitens der Kunden werden gerne entgegengenommen, um die nächste Ausgabe des Katalogs effizienter zu gestalten.

Magneti Marelli After Market Parts and Services S.p.A. a soigné avec une attention particulière la rédaction de ce catalogue; elle décline cependant toute responsabilité pour toute erreur ou omission éventuelle dans les schémas, les dessins, les images, les correspondances avec les codes O.E., etc. et se réserve le droit d'en modifier le contenu sans obligation de communication préalable. Les commentaires, les signalisations d'inexactitudes et toute autre suggestion des utilisateurs susceptibles de rendre la prochaine rédaction du catalogue plus efficace seront particulièrement appréciés.

Magneti Marelli After Market Parts and Services S.p.A. ha cuidado con especial atención la redacción del presente catálogo; de todas maneras declina toda responsabilidad por eventuales errores u omisiones relativos a esquemas, diseños, fotos, correspondencia con los códigos O.E., etc., y se reserva el derecho de aportar modificaciones al contenido sin la obligación de previo aviso. Se agradecen especialmente los comentarios, las indicaciones de inexactitudes y cualquier otra sugerencia por parte de los usuarios que sean útiles para hacer más eficaz la próxima edición del catálogo.

A Magneti Marelli After Market Parts and Services S.p.A. cuidou com particular atenção a redação do presente catálogo; como quer que seja, rejeita qualquer responsabilidade face a eventuais erros o omissões relacionados aos esquemas, desenhos, imagens, correspondências aos códigos O.E. etc. e reserva-se o direito de introduzir alterações ao seu conteúdo sem a obrigação de comunicação prévia das mesmas. São particularmente bem aceitos, comentários, sinalizações de inexactidões e qualquer outra sugestão idônea a tornar mais eficaz a próxima edição do catálogo.

Η Magneti Marelli φροντίσε με κάθε λεπτομερεια την ορθότητα των στοιχειων αυτου του καταλογου, δεν φερεi ομως καμια ευθυνη για τυχον λαθη ή παραληψεις που σχετιζονται με σχηματα, σχεδια, εικόνες, αντι-στοιχιες με γνησια νουμερα κτλ. και επιφυλασσειται του δικαιωματος να αλλαξει το περιεχομενο του καταλογου οποιαδηποτε στιγμή χωρις προτερη ενημερωση. Οποιαδηποτε σχολια η παρατηρησεις, με στοχο την βελτιωση του καταλογου, ειναι ευπροσδεκτα.

Firma Magneti Marelli After Market Parts and Services S.p.A dołożyła szczególnych starań przy opracowywaniu niniejszego katalogu. Nie ponosi ona jednak żadnej odpowiedzialności za ewentualne błędy lub braki dotyczące schematów, rysunków, zgodności z kodami O.E., itp. u. Firma Magneti Marelli After Market Parts and Services S.p.A zastrzega sobie prawo do wprowadzania zmian bez obowiązku uprzedniego powiadomienia o tym. Szczególnie mile widziane są komentarze i sygnały dotyczące nieprawidłowości oraz jakiegokolwiek inne sugestie zgłaszane przez klientów, mające na celu udoskonolenie następnych edycji katalogu.

Magneti Marelli After Market Parts and Services S.p.A. уделила особое внимание созданию этого каталога. Но, несмотря на это, мы не несем ответственности за возможные ошибки или неточности в цифрах, изображениях или кросс-номерах. Также мы оставляем за собой право вносить любые изменения в содержание каталога без предварительного уведомления. Мы приветствуем любые ваши замечания и комментарии, которые обязательно учтем при подготовке следующих выпусков каталога.

Magneti Marelli After Market Parts and Services S.p.A bu katalogdaki bilgileri çok dikkatli bir şekilde hazırlamış olup, buna rağmen rakam, çizim, resim, OE kodları ve diğer tüm bilgilerdeki hata ya da eksikliklerin sorumluluğunu kabul etmez ve ön bilgi vermeden değişiklik yapma hakkını saklı tutar. Bir sonraki katalogun iyileştirilmesine yardımcı olacak kullanıcı yorumları, hata raporları, ya da diğer öneriler değerlendirmeye alınacaktır.

È vietata la riproduzione, anche parziale, del contenuto del presente catalogo senza preventiva autorizzazione scritta della Magneti Marelli After Market Parts and Services S.p.A., che tutelerà i propri diritti a termine di legge.

It is forbidden to reproduce, even partially, the contents of this catalogue without prior written consent from Magneti Marelli After Market Parts and Services S.p.A., who will protect its rights in accordance with the law.

Die Vervielfältigung, auch teilweise, des urheberrechtlich geschützten Inhalts des vorliegenden Katalogs ist ohne schriftliche Genehmigung durch Magneti Marelli After Market Parts and Services S.p.A. untersagt.

Il est interdit de reproduire même partiellement le contenu de ce catalogue sans autorisation écrite préalable de Magneti Marelli After Market Parts and Services S.p.A., qui protégera ses droits selon les termes de la loi.

Está prohibida la reproducción, total o parcial, del contenido del presente catálogo sin previa autorización escrita de Magneti Marelli After Market Parts and Services S.p.A, que protegerá sus propios derechos con arreglo a la ley.

É proibida a reprodução, também parcial, do conteúdo do presente catálogo sem a prévia autorização escrita de Magneti Marelli After Market Parts and Services S.p.A, que defenderá os próprios direitos, nos termos de lei.

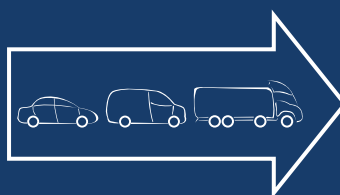

Απαγορεύεται η αναπαραγωγή, ολική ή μερική, του περιεχομένου του παρόντος καταλόγου χωρίς την γραπτή εξουσιοδότηση της Magneti Marelli After Market Parts and Services S.p.A.

Zabroniona jest nawet częściowa reprodukcja zawartości katalogu bez uprzedniej pisemnej autoryzacji ze strony firmy Magneti Marelli After Market Parts and Services S.p.A., która chroni swą własność zgodnie z przepisami prawa.

Запрещается полная или частичная перепечатка содержания каталога без предварительного письменного разрешения Magneti Marelli After Market Parts and Services S.p.A. Компания будет отстаивать свои интересы в соответствии с законом.

Tüm yasal hakların sahibi olan Magneti Marelli After Market Parts and Services S.p.A. 'in yazılı izni olmaksızın mevcut katalogun kısmen de olsa çoğaltılması yasaktır.
